Case Studies

Pier9 collaboration & Fusion integration

An advanced beta-test / early release phase. We really needed to:

- Stretch and break the tool
- Be as agnostic as possible to the use-case
- Whilst being as flexible as possible
- Understand limitations before roll-out
- Know what to release and what to hold-back
- Create best solution for integrations, without the complexity
- Validate whether the design philosophy translates easily

INSIST ON THE HIGHEST STANDARDS
