Resources

We needed to scale this past an experimental idea.

Major learning from the early validation:

- Decades of work can be leveraged here
- We need to conduct research for technical possibilities
- We need to conduct research for design philosophy translation
- It will need major compute power on-tap, scalability

- How do we leverage internal teams …?
- What already exists in the behemoth of Autodesk …?

FRUGALITY

Computational Science Research

advanced computing capabilities

Industry Research

discovering new user experiences

Life Sciences

protein engineering

Complex System Research

introducing deeper systems

Design & Social Impact

enabling high impact

Machine Learning

machine learning and design

Robotics Lab

future vision of robotics

Simulation & Graphics Research

natural phenomena simulations

The Living

future of built environment
